

**6KV High Isolation DC Current/Voltage Single/Dual Signal Isolated Amplifier IC  
(Electromagnetic Isolation)  
ISOEMH Series**

**General characteristics:**

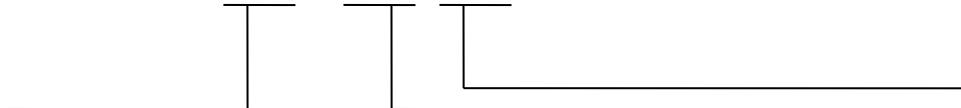

- Low cost, small size, SIP 16pin anti-fire UL94V-0 package
- No external component, need not "ZERO" and "G.adj" adjustment.
- Three-port (power/input/output) isolation: 6000VDC
- Assistant power supply: 5VDC/12VDC/15VDC/24VDC
- 0-75mV/0-2.5V/0-5V/0-10V/0-±100mV/0-±5V/0-±10V voltage 0-10mA/0-20mA/4-20mA/0-±10mA/0-±20mA current isolation and transfer
- Temperature range: -45~+85 °C
- In EMC(electromagnetism disturb) circumstance need adopt shield measure.

**Applications:**

- DC current/voltage signal isolated/transfer/amplifier
- No distortion in long distance signal transmission
- Rail-transit 750V/1500 voltage isolation and sampling.
- 4-20mA(0-20mA)/0-5V signal isolation and transfer
- Equipment and sensor signal acquisition
- Signal transmit no-distortion
- Electric power, distant control, isolated safe bar
- Industrial high voltage equipment operation monitoring and remote control.
- Ground interference control and high isolation

**Model Selection:**

**ISOEMH - U(A)□ - P□ - O□**

| <b>Input signal U/A</b> | <b>Auxiliary power supply P</b> | <b>Output O</b> |
|-------------------------|---------------------------------|-----------------|
| U1:0-5V                 | P1:DC24V                        | O1:4-20mA       |
| U2:0-10V                | P2:DC12V                        | O2:0~20mA       |
| U3:0-75mV               | P3: DC5V                        | O4:0~5V         |
| U4:0-2.5V               | P4:DC15V                        | O5:0~10V        |
| U5:0-±5V                | P8:User-defined                 | O6:1~5V         |
| U6:0-±10V               |                                 | O7:0~±5V        |
| U7:0-±100V              |                                 | O8:User-defined |
| U8:User-defined         |                                 | O9:-20~+20mA    |
| A1:0-1mA                |                                 | O10:0~±10V      |
| A2:0-10mA               |                                 |                 |
| A3:0-20mA               |                                 |                 |
| A4:4-20mA               |                                 |                 |
| A5:0-±1mA               |                                 |                 |
| A6:0-±10mA              |                                 |                 |
| A7:0-±20mA              |                                 |                 |
| A8: User-defined        |                                 |                 |

**Examples:**

(1) Input:0-5VDC Output:0-5VDC Power:24VDC 6KV high isolation

Model:ISOEMH-U1-P1-O4

(2) Input:4-20mA Output:4-20mA Power:24VDC 6KV high isolation

Model:ISOEMH-A4-P1-O1

**Specification:**

SUNYUAN ISOEMH series is a kind of electromagnetic isolation integrated IC, it is made of isolated DC/DC converters and electromagnetic isolation signal amplifier, it is ideally applied in the field with no special requirements on EMC(electromagnetism disturb). Compared to photoelectric isolation converter, it can not be used in strong magnetic field, so clients need to adopt shielding measures, it can reach 6000VDC insulated. Sunyuan ISO EM series it is very easy to use,no external components are required.

★ Products package: PCB Mounted type and DIN 35 1x2 or DIN35 2x2 Rail-Mounted

★ 0-5V/0-10V/0-75mV/0-2.5V/0-1mA/0-10mA/0-20mA/4-20mA Isolated signal of international standard signal input and output

Accuracy grade:0.1/0.2,Extremely high linearity in whole process(non-linearity<2%), need not "ZERO"and "G.adj" adjustment..

**Max operation range:**

|                                  |         |
|----------------------------------|---------|
| Continue isolation voltage value | 6000VDC |
| Power Vin range:                 | ±25%Vin |
| Jointing temperature(10sec.)     | +300°C  |
| Vout signal load(MIN)            | 2KΩ     |

If over above range,maybe cause products damaged permanently.

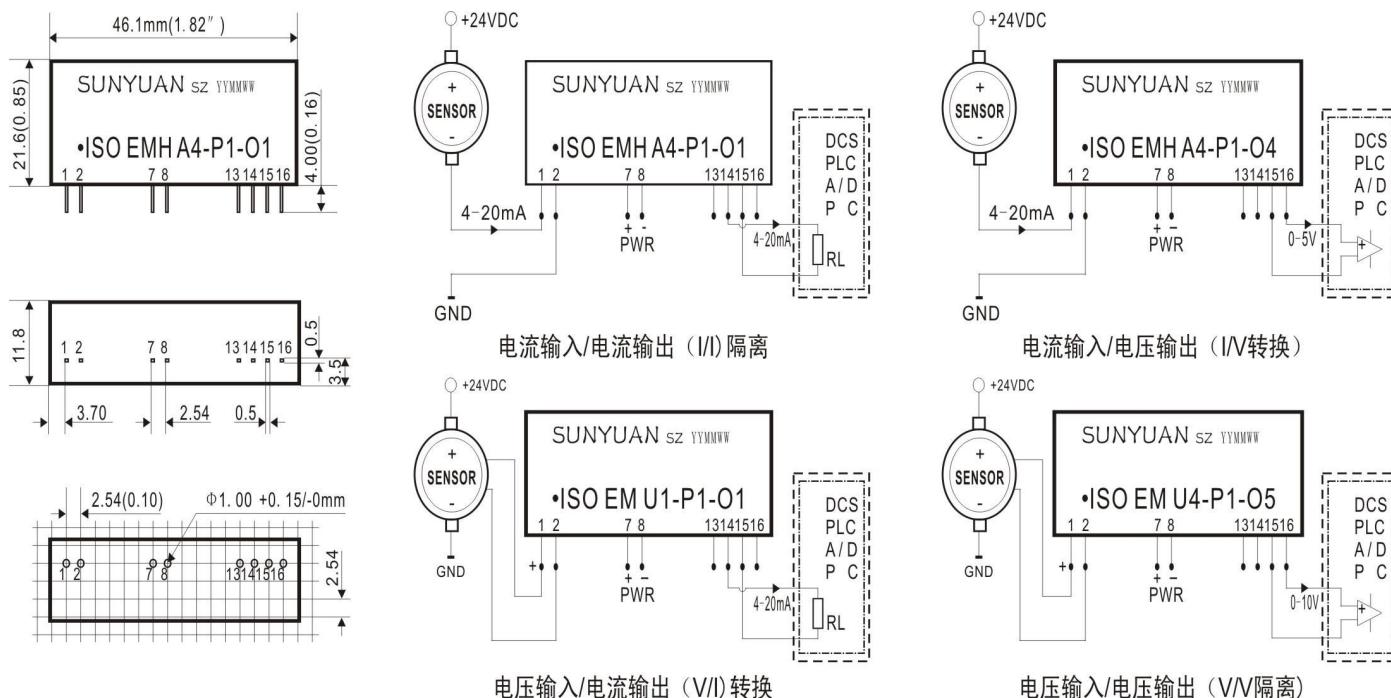

**Technical parameters:**

| Parameter                        | Test Conditions | Mix          | Type | Max  | Unit   |
|----------------------------------|-----------------|--------------|------|------|--------|
| Isolated voltage                 | AC,50Hz,1min    | 3000         |      |      | V(rms) |
| G.Adj                            |                 |              | 1    |      | V/V    |
| G.Adj temperature drift          |                 |              | 25   |      | ppm/°C |
| Non-linearity                    |                 |              | 0.1  | 0.2  | %FSR   |
| Input signal                     | Voltage         | 0            |      | 15   | V      |
|                                  | Current         | 0            |      | 30   | mA     |
| Input maladjusted voltage        |                 |              | 2    | 5    | mV     |
| Input impedance                  | Voltage         |              | 1    |      | M      |
|                                  | Current         |              | 250  | 1000 | Ω      |
| Output signal                    | Voltage         | -10          |      | 10   | V      |
|                                  | Current         | -20          |      | 20   | mA     |
| Load capability                  | Voltage         | Vout=10V     | 2    |      | kΩ     |
|                                  | Current         | 0            | 350  | 650  | Ω      |
| Frequency response               | -3DB            |              | 0.5  | 10   | KHz    |
| Signal output ripple             | No-filter       |              | 10   | 20   | mVRMS  |
| Signal voltage temperature drift |                 |              |      | 0.2  | mV/°C  |
| Assistant power                  | Voltage         | User-defined | 3.3  | 12   | VDC    |
|                                  | Power loss      |              |      | 0.5  | 1      |
| Operating temperature            |                 | -45          |      | 85   | °C     |
| Storage temperature              |                 | -55          |      | 105  | °C     |

**Note:**If need special load capability of voltage/current signal,please explain.

| Output | Output load capability                 | Response Time     |
|--------|--|-------------------|
| 4-20mA | $\leq 350\Omega$                       |                   |
| 0-20mA | ( If need $650\Omega$ ,please explain) |                   |
| 0-5V   |  | $\leq 1\text{mS}$ |
| 0-10V  | $> 2\text{k}\Omega$                    |                   |
| 1-5V   |  |                   |

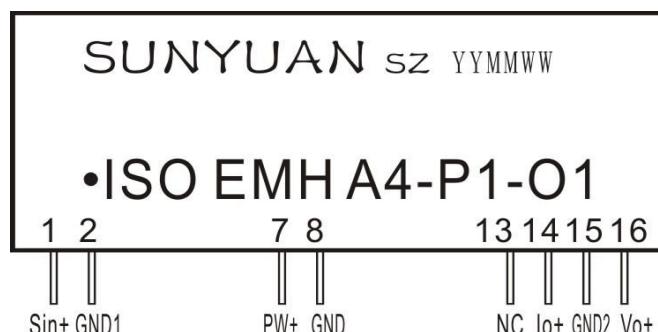

### Physical Dimensions and Pin Description:

### SIP 16 Pin Definition (“ZERO”and “G.Adj” adjustment are not required).

| PIN         | 1                 | 2                 | 3-6     | 7         | 8         | 9-12    | 13      | 14                          | 15                          | 16                        |
|-------------|-------------------|-------------------|---------|-----------|-----------|---------|---------|-----------------------------|-----------------------------|---------------------------|
| Description | Signal input Sin+ | Signal input GND1 | omitted | power PW+ | power PW- | omitted | omitted | Current Signal output Iout+ | Isolated signal output GND2 | Voltage signal output Vo+ |

**Note:** The isolation amplifier module can not be used in the field of strong electromagnetic interference.
